

Everyone benefit from using this product

SEA TRANSPORT – INDUSTRY – LAND TRANSPORT

EuroAd is suitable for all types of combustion engines and burners, we have products for both fossil- and bio fuels. EuroAd clean the entire fuel system, removes carbon residue, soot and reduce harmful emissions. EuroAd gives you a more complete combustion, for improved fuel efficiency and reduction of emissions.

Benefits of

EuroAd

FULFILLS THE REQUIREMENTS
ACCORDING TO EUROPEAN
STANDARD

- A more complete combustion
- Lower your fuel consumption with an average of 10%
- Reduces maintenance costs
- Reduces harmful emissions
- Cleans the entire fuel system
- Helps keep your fuel injectors, inlet channels, valves and combustion chambers cleaner
- Suits all combustion engines and burners
- 100% active content
- Safe – non-toxic – environmentally adapted
- Manufactured with 100% vegetable substances

EuroAd

- Makes a difference for our shared environment and your finances

With **EuroAd** you can reduce the environmental impact, and at the same time save money. **EuroAd** is suitable for all combustion engines and have the same great effect on for example oil- fueled boilers. Documented tests show that EuroAd is a great choice, for both industry and transport companies.

EuroAd - Properties

- Decreases harmful emissions in both fossil, bio driven engines and burners.
- Improved combustion gives a higher energy output, the engine runs better and fuel consumption is reduced.
- Soot deposition in the combustion chamber are heavily reduced. A cleaner and more complete combustion reduces the maintenance costs.

About EuroAd

EuroAd is a 100% vegetable based product.
EuroAd is 100% biodegradable and are totally non-toxic.
EuroAd EuroAd is not harmful to engines or other parts of the vehicle/burners, either short or long term.
EuroAd dissolves completely once added to the fuel.

EuroAd has a cleansing effect, breaks down and prevents emerge of bacteria. EuroAd contains no artificial chemical substances or petroleum additives.

EuroAd cleans the entire fuel system; the tank, fuel lines, combustion chambers, valves, nozzles and fuel injectors.

With **EuroAd** in the fuel, each fuel molecule is oxygenised more efficient. With cleansed fuel injectors/ nozzles and the added oxygen, a more efficient combustion is achieved. In that way more energy can be extracted from the fuel and fewer soot particles are generated. You will lower your fuel consumption and reduce dangerous emissions.

Automatic dozers

We have solutions for all types of combustion engines and burners.
Easy handling and a measured amount of EuroAd can be achieved with our automatic dispensers. EuroAd is pumped into the fuel and the manual handling at each refuelling can be avoided completely.

Documented tests

Svenska Shell has analyzed the oil from the circuit racing cars in the SLC series. One analysis was carried out with EuroAd added to the fuel and one without.

Saybolt, a Swedac accredited laboratory has tested the MK1-DIESEL with EuroAd added to the fuel, against Swedish standard SS155435 edition 4 and EN-590, EU standard, one test with 5% RME and one without RME.

MoRe Research has tested emissions on a cargo vessel. The vessel was tested on a reference basis without EuroAd and then tested again with EuroAd added to the fuel.

Analytica, a Swedac accredited laboratory has analyzed EuroAd and found that the content of EuroAd is not harmful to the environment, engines or humans.

SAFETY SHEET for EuroAd

WARRANTY....

The company Emission Particle Solution Sweden AB guarantee that this additive of 100% vegetable substance, are non-toxic and are not in any way harmful for engines, fuel systems or other part of the vehicle/burner belonging parts, neither for long or short term.
